

## **Tarot Inner Guidance**

Most people when they think about tarot the first thing that comes to mind are predictions and yet there is a lot more to tarot than just predicting the future. There medication, past lives, numerology, and self-realization are just a few which can help us to tap into our higher-self as each card contains something valuable and as well the images on the cards helps us to see the truth into the miracle we truly are. Many of us don't realize that miracles don't just happen to anyone they happen to all of us all the time. Most of us tend to think it only happens to those few we hear about but in reality, many of us don't realize we create our own miracles through the power of the self. Yet for many of us the only thing that is stopping us from moving forwards in life is our self-trust in that we believe that the miracles that occur are outside of ourselves.

These days life can be very hard some of us we get so wrapped up in our every day life situations that we can easily lose sight of dreams some of us suffer more than others and bit-by-bit it slowly steals not only our dreams and our faith as well. The greatest way to the secret for eliminating our inferiority complex that we have created through our life experiences is to fill our invisible world up with positive energy. The monthly tarot can give us the tools that will help us to achieve our goals and dreams and as well answer some of those unanswered questions that we all seek.

## The Wheel of Fortune 10

The Wheel of Fortune symbolizes that we are the creators of our own lives. It is important to realize that we are our thoughts as the card tells us that who we are today is because of what we did yesterday and who we are tomorrow depends on what we do today. It's through our thoughts and beliefs that the wheel turns. Sometimes we have control over our destiny and others times we may feel that we don't but either way we can stand still and wait for the changes to happen or we can move forwards on our own. It is through taking responsibility for our own actions that it brings out our awareness that the wheel turns in the direction of our thoughts and our choices. Life does offer us many

opportunities and challenges how we react to our circumstances can make the difference in our spiritual growth. It is through aligning ourselves with our source that we open the doors that will bring us our greatest satisfaction and our life's fulfillment.

### Our Fears

One of the reasons why many of us never reach our full potential in life is that we spend our time and energy worrying about how others view us or how we view ourselves. It may enter into our lives in any form fear of loss, fear of failure, or fear of being hurt and so on the list of fears is endless. Many of the things that we seem to worry about or fear most of the time don't really materialize and when you let fear take over your life all it does is stop you from moving forwards in life. Most people don't realize that we are what we think and when were not aligned with our higher self it can cause us to lose our trust in our own creativity and powers. Perhaps the greatest lesson for us all is to some how learn to overcome our fears, because after all to fear something means that you are afraid to live. One of the things we could do that would help us in overcoming our fears is to be a witness of our own thoughts by doing so it changes our self- perception. With time and practice, you will come to realize that the things you were afraid of were just states of the mind and nothing more.

### Month 1

This is a good month to test out any of your ideas don't be afraid of the out come of any thing you do, as it is only through your actions that you gain the knowledge and wisdom from that experience. However this doesn't mean acting foolishly, look into all your opportunities before making any decisions. What ever you decide on this month are the beginnings of new things as the seeds you plant today are your tomorrow future. It is important to keep the communication lines open within yourself don't be afraid to listen or to talk things over with that voice in your head, as it is only through the stillness of the mind that we connect to our soul's purpose. It doesn't matter if it your home, family, or

work place a good dose of common sense, a cheerful attitude will help to enhance your leadership abilities which will open new doors that will attract the right people into your life why not be the best you can be as you were meant for greatness.

## The Justice 11

The Justice represents our “Karma” for it is through our actions that we learn the law of cause and affect. It is through our understanding of this law that we begin to realize that only you are responsible for the choices you make. Even though you may think at times, that life is unfair it is not, for the Justice is not blind for you can see she is looking right at you and you do receive back what you give out. Our inner divine laws are not bound by our human limitations of the material world and sometimes we may have to realize that what we desire doesn’t always come into our life the way we think it should.

I think it is important for us to realize that it’s not the events of our life that is important, but how we handle our life situations that determine the cause and affect of our actions. Once you thoroughly understand this law which can sometimes be a tough lesson to learn you will begin to see for yourself the truth of your actions.

## Our Sensitivity

These days it seems that many of us tend to be overly sensitive and it depends on our stress levels as to how we react emotionally. Many of us may not even realize that our sensitivity level is usually triggered by our emotions may it be positive or negative. It is only when we pay attention to our reaction to any given situation that we become aware of the feeling of our emotions. For most of us, our sensitivity levels become a vicious circle that through out our day we may feel like we are on a roller coaster ride of highs and lows. Most of the time our emotional pain begin when we allow our thoughts to fester to the point of anxiety which then start to manifest it self in different areas of our lives. Perhaps the only way to stop this manifestation of our negative thoughts is to learn to become a witness to your own thoughts and feelings. And in time with practice the traumas of our life will dissolve as you will learn how to keep your emotions from running your life.

## Month 2

This month is a good time to relax, spend time doing things that you enjoy for there is nothing wrong with pampering yourself. Don’t let anything upset you sometimes the bad attitudes of others can easily get us down so it is important to stay level headed and grounded within yourself. This is also not a good time to rush into anything that you are not sure of examine the pros and cons thoroughly before making any important decisions. This month is more about cooperation and assisting, you may find that through your patience, and understanding things will run more smoothly for you through out the

month. There may be times where you may feel like you want to please everyone so you may have to remind yourself that the “self“does matter. If a situation should arise just kindly remove yourself and keep a safe distance as you don’t need to be a doormat to everyone. Another thing to watch for is don’t take things too personally as all it does is drains you of your energy. Just relax and go with the flow of life.

To find the number of your Tarot Personal Month, add the number of the month and day of birth, to the month and year that it is. Reduce this number to a single digit. Remember that you can only count to 9 when figuring out your personal month

Example: say you were born January 12 1955

The date of birth

Add  $1+1+2=4$

Year and month that you are in June 2008

Add  $6+10=16/7$

Now add them both together

Add  $4+7= 11/2$

This would mean that your monthly cycle would start on the Justice card which is the 2 month.
