

Tarot Monthly Inspirations

Most people when they think about tarot the first thing that comes to mind are predictions and yet there is a lot more to tarot than just predicting the future. There medication, past lives, numerology, and self-realization are just a few which can help us to tap into our higher-self as each card contains something valuable and as well the images on the cards helps us to see the truth into the miracle we truly are. Many of us don't realize that miracles don't just happen to anyone they happen to all of us all the time. Most of us tend to think it only happens to those few we hear about but in reality, many of us don't realize we create our own miracles through the power of the self. Yet for many of us the only thing that is stopping us from moving forwards in life is our self-trust in that we believe that the miracles that occur are outside of ourselves.

These days life can be very hard some of us we get so wrapped up in our every day life situations that we can easily lose sight of dreams some of us suffer more than others and bit-by-bit it slowly steals not only our dreams and our faith as well. The greatest way to the secret for eliminating our inferiority complex that we have created through our life experiences is to fill our invisible world up with positive energy. The monthly tarot can give us the tools that will help us to achieve our goals and dreams and as well answer some of those unanswered questions that we all seek.

The Magician

Month 1

The very first step you need to recognize when it comes to the Magician is the force that lies within you, as it will take you into the greater part of your self. This awareness is very important for you must acknowledge and feel these forces before you can tap into them. The symbols in themselves represent that all things are possible when we learn to tap into the power of the universe for you will be able to utilize the energy and the knowledge in the sub-conscious mind first and then you can bring them down and use them in your daily life. Before him on the table, we see a Wand, [ideas] Cups, [desire], Sword [action], Pentacles [foundation] they represent the tools to which you can work with and once you

realize all things are possible it is up to you to go after them. One might be thinking is the Magician successful it will be up to you in taking that first step in having a positive attitude and a desire to learn new things to move forward in knowing that your ability or your dreams do exist within you.

Inner world

The mind is very powerful and many of us don't realize just how powerful we truly are. Our power comes from our thoughts very thought we have is our seeds of our future if we plant positive seeds we will attract positive things into our life and less of the things we don't want. Many of us don't realize that all of us suffer from our own form of self-doubts, insecurity, and fears, so don't think you are the only one you are not. Yet you will come to realize that by pushing yourself forward in overcoming what ever stands in your way that you will begin to realize the magic within your own life for your fears and self-doubts will vanish for with action comes understanding and knowledge.

Outer World

The most important thing to remember this month it to be true to yourself, have confidence in who you are for the self does matter. What dreams or goals do you have? don't be afraid to try them out, but be wise in your choice for not every seed we plant will grow into positive results or turn out the way we think. Many opportunities will be open to you this month so keep an open mind when it come to your awareness, as to the way we look at things for there are many different and new ways of doing thing so that we get better results may it be our ideas, situations, relationships or our careers.

This month you can do anything you want to do just sit down in a quiet place and let our inner guide show you the way. This is done by manifesting your ideas in your head first by planning and picturing what you want do which will also boost yourself confidence and when all you have to do is take that one step in making your ideas a reality and with each step you take you are that much closer in realizing our own greatness.

The High Priestess

Month 2

The High priestess acts as a doorkeeper to our higher consciousness for in her lap she holds scroll of Torah, the Divine Law for it holds the secrets to the mystery of life. The pillars that stand on each side of her represent our positive and negative side of ourselves. At some point within our life time, she will let us know that we can make that choice to choose the path to our higher consciousness. But until then for most of us, it can be hard to tap into our deep inner self, as it seems we get so caught up in our daily lives that we can lose our sense of being in that we look for guidance outside of our selves.

So much about us is hidden that many of us really don't know who we are and when you look at the world of our emotions, beliefs, attitudes, motives, and our values we come to realize that there is so much more to explore within ourselves. The high Priestess offers us a journey of self-discovery and self-realization to those that are searching for higher truth and wisdom.

Inner World

Our emotions and what we come to believe about ourselves plays an important role in our lives and it tends to be a very sensitive area for all of us. When was the last time you had strong feeling about something and were afraid to listen to your own intuitions or hunches, well you are not alone most of us are forever second guessing ourselves which in the end only causes us to lose our faith and trust within ourselves. And without trust our inner world tends to be very sensitive because we are not to sure just what is truth and what is false. It is only when we listen to our intuitions or one could say our gut feeling that we are connected to the unseen universal truth the invisible thread that links us up to our inner wisdom and knowledge for the truth which lies head when we follow our heart.

Outer World

Sensitivity is the thing to watch out for in this month, are your feelings strong? or are you afraid to follow or act on what you feel. As hard as it may be, try to stay calm and relaxed when situations come up or when others try to invoke your temper for it is important that you stay balanced within yourself. Spend some time with friends, family, or that someone special, but try not to get over emotional over the little things for they always seem to work themselves out in the end. Diplomacy and patience is the way into the hearts of others for it will help to ease any unpleasantness that others may be feeling. Listen to your intuitions take in what's going on around you, but don't take the lead wait, while

before making a move and don't let others rush you into anything that you are not sure of know the truths from the false.

Get plenty of rest and go with the flow of life read a good book or take a relaxing drive in the country enjoy any quiet time that comes your way as it will help to ease any tension or built up stress that life seems to throw at us.

To find the number of your Tarot Personal Month, add the number of the month and day of birth, to the month and year that it is. Reduce this number to a single digit. Remember that you can only count to 9 when figuring out your personal month

Example: say you were born January 12 1955

The date of birth

Add $1+1+2=4$

Year and month that you are in June 2008

Add $6+10=16/7$

Now add them both together

Add $4+7=11/2$

This would mean that your monthly cycle would start on the High Priestess card which is the 2 month.
